WETZEL COUNTY FILE: LCA

~~RESEARCH CONDUCTED IN THE SCHOOL SYSTEM~~

~~It is recognized that there is a great need for valid educational research. Being located near a university, Wetzel County is convenient for graduate students and professors. It is the policy of the Wetzel County Board of Education to cooperate in legitimate research projects whenever possible. However, it is the responsibility of the Board to see that the school program is not disrupted by research activities. Therefore, the following regulations shall govern research activities:~~

- ~~1. All requests for the conducting of research in Wetzel County Schools shall be made to the Superintendent who shall ascertain (1) that the request is valid, (2) that the research procedure is sound, (3) that the research will not be excessively disruptive to the educational program, and (4) that the research will not place an unnecessary burden on the students or employees. If he is satisfied that the above requirements have been met, he may grant written permission for the research to be conducted.~~
- ~~2. The decision of the Superintendent may be appealed to the Board of Education.~~
- ~~3. No one may conduct research within the Wetzel County school system without written permission of the Superintendent or the Board.~~
