WETZEL COUNTY FILE: LE

~~RELATIONS WITH COLLEGES AND UNIVERSITIES~~

~~We believe that the establishment of positive relationships between the Wetzel County Public Schools and area colleges and universities works to the benefit of all parties concerned. Professors from institutions of higher education can help us keep abreast of the current research in instructional techniques and learning theory. In addition, the utilization of consultant services from universities and colleges allows us the opportunity to hear and consider alternative solutions to problems, that those of us personally involved in the situation may overlook.~~

~~The Wetzel County Public Schools also recognize that they have an obligation to assist the teacher training institutions in preparing new teachers for the profession by allowing a predetermined number of student teachers to gain their laboratory experience in county schools.~~
